### Restaurant Project

This project is intended to put all your hard work into a fun and real-life project with your family!

Directions: Choose a restaurant you and your family would like to dine at. (You don't really need to go to a restaurant, you can just choose from the menu.) List the family members' names and what they are ordering. Add all the items to find the price of the food and beverages. You also need to calculate the tax and tip and add it to the final bill.

List food ordered and price:

_____	_____
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____

Add the order. Multiply tax 6% or .06. Add to the bill. Multiply tip 20% or .2. Add to the bill with tip for total price. (Show all work on grid paper). Check with calculator to make sure you are correct!
